Deadline to Register: September 8, 2017

➤ http://bit.ly/SimiValley_Exchange

Geometry + Computer Visualization/Simulation

- ★ Integrates Geometry ("c") with the Information and Communication Technologies CTE sector
- ★ Full course description: <http://bit.ly/2oYX1NR>

Algebra 2 for the 21st Century

- ★ Integrates Algebra 2 ("c") with the Information and Communication Technologies CTE sector
- ★ Full course description: <http://bit.ly/2vNwMcD>

At this UCCI Teacher Exchange, attendees will:

- ★ **Observe** sections of both courses to see the course curriculum in action.
- ★ **Receive** a complete set of materials for implementing the first unit of the course and **collaborate** with colleagues to develop curriculum beyond the first unit.
- ★ **Work** directly with a UCCI Teacher Exchange Leader to test out projects in the course.

**All materials created at the Exchange will be shared on the UCCI website and made available as resources for others interested in learning about the course.*

or contact Katie Leslie at Katherine.Leslie@ucop.edu.

At the UCCI Institutes, held regionally and on demand at locations around California, teachers work together to design UCCI Courses, innovative and challenging courses integrating academic subjects such as English, history and mathematics with career technical education (CTE) content. At present, there are **72 courses** on the UCCI course catalog, all of which are available for any CA high school to teach. View the UCCI course list at <http://ucci.ucop.edu/integrated-courses/a-g-table.html>. More courses are being created at various UCCI Institutes held each year.
